

INSTRUCTION
on professional practices passing using distance learning technology

Types of practices	Operating procedure
Educational and technological practices	<ol style="list-style-type: none"> 1. Methodological instructions and technical assignment for training practice using distance learning technology to the content of AIS “Platonus” should be uploaded by the scientific supervisor according to the distributed workload (order for the university), the assignment (set deadlines) in an automated system for checking written work (posted on the site) should be fixed; 2. A student at the place of practical training needs to collect materials on assignments and attach reports to an automated system for checking written work through the university website to check for anti-plagiarism and send to the supervisor; 3. Supervisor should check and evaluate reports, if necessary, through a web-conference in the ZOOM platform.
Pedagogical internship	<ol style="list-style-type: none"> 1. Heads of departments, chairmen of the faculty’s methodological commission, review methodological instructions for passing pedagogical practice taking into account training using distance educational technology and upload to the content in the AIS “Platonus”; 2. The heads of departments sign an agreement with the directors of schools, colleges, heads of departments of universities on the students profile to complete pedagogical practice online (assistant teacher, lecturer); 2. According to the workload (the order for the university), the supervisors of the practices should assign tasks for students; 3. The student at the place of residence have to, according to the agreement with the teachers of the school, college, university lecturers, conduct joint training sessions in accordance with the program and methodology; 4. At the end of the practice, students attach the reports (with supporting documents of conducting classes, photos, videos) to the automated system for checking written work using the university website to check work for plagiarism and send it to the supervisor; 5. Supervisor checks and evaluates reports on the practice, if necessary through a web-conference in the ZOOM platform.
Production (clinical) practice	<ol style="list-style-type: none"> 1. Head of departments, chairmen of the faculty methodological commission revise methodological guidelines for practical training taking into account training using distance learning technology individually; 2. Head of departments sign an agreement with the heads of enterprises, with local executive bodies, institutions on the students profile for practical training with assignments on an individual basis (assistant agronomist, technician, electrician, veterinarian, livestock specialist, financier, tax officer, bank employee , architect, designer, land surveyor, teacher, etc.);

	<p>3. According to the workload (order at the university), the supervisors of the practices should fix technical assignments to students;</p> <p>4. The student at the practical training place, in agreement with the supervisors of the practice (tutors), must jointly perform duties as an assistant and collect material in accordance with the program and methodology;</p> <p>5. At the end of the practice, students attach the reports (with supporting documents for conducting classes, photos, videos) to the automated system for checking written work using the university website to check for plagiarism and send it to the supervisor;</p> <p>6. The supervisor check and provide feedback;</p> <p>7. The student will prepare a presentation material with a report to demonstrate the report through a web conference in the ZOOM platform for the commission.</p>			
Externship	<p>1. Head of departments, chairmen of the faculty methodological commission revise methodological guidelines for practical training taking into account training using distance learning technology individually;</p> <p>2. Head of departments sign an agreement with the heads of enterprises, with local executive bodies, institutions on the students profile for practical training with assignments on an individual basis</p> <p>3. The student, at the place of practice, must, in agreement with the supervisors of the practice (mentors), collect the missing material online, analyze, summarize the materials of the final work and prepare a thesis (project) according to the program and methodology for its implementation;</p> <p>4. At the end of the practice, students attach the reports (with supporting documents for conducting classes, photos, videos) to the automated system for checking written work using the university website to check for plagiarism and send it to the supervisor;</p> <p>5. The supervisor should check and provide feedback to the head of the department by e-mail (attach to the verification system of written works);</p> <p>6. The student will prepare a presentation material with a report to demonstrate the report through a web conference in the ZOOM platform for the commission.</p>			
Professional practice in the form of online courses	<p>Course name</p> <p>"Introduction to Digital Electronics"</p> <p>"Metrology and electro-radio measurements"</p> <p>"Wireless Wi-Fi networks"</p>	<p>Educational portal</p> <p>https://www.in</p>	<p>Work algorithm</p> <p>1. The student is registered on the educational portal.</p> <p>2. Selects the desired course.</p> <p>3. The student gets access to educational material, practical tasks and control tasks.</p> <p>4. The head of practice from the university provides consultations on the</p>	<p>Result</p> <p>Getting a</p>

		tuit.ru	<p>implementation of practical tasks, and prepares the student for passing the test.</p> <p>5. The head of practice attaches the materials to AIS “Platonus”.</p> <p>6. At the end of the course, the final test is taken, in case of successful completion an electronic certificate is given.</p> <p>7. Based on the results of the practice, the student draws up a report and attaches a certificate.</p> <p>8. Depending on the course, its complexity and volume, the entire learning process can be built on a distance basis. Materials are always available distantly.</p>	<p>certificate for the completed course</p> <p>(electronic certificate)</p>
	<p>"Fundamentals of network technologies". Cisco networking Academy</p>	<p>https://www.netacad.com/</p>	<p>1. The student provides an email address to register in the Cisco Academy.</p> <p>2. The Cisco instructor (practice Manager) assigns the student to the training course, according to the program, forming a training class.</p> <p>3. The student receives an invitation by e-mail to access the class: educational material, practical tasks, laboratory work, video materials and control tasks.</p> <p>4. The instructor provides consultations on practical and laboratory tasks, opens access to the delivery of control tasks as the course chapters will be completed. A practical exam is also taken.</p> <p>5. At the end of the course, the Final exam is passed, and in case of successful completion, an electronic certificate of the Cisco Academy is given.</p>	<p>Getting a certificate for the completed course</p> <p>(electronic certificate)</p>

			6. Depending on the course, its complexity and volume, the entire learning process can be built on the distance principle. Materials are always available distantly. To perform laboratory work, you need to install additional software from Cisco on your personal computer. If necessary, the training materials are supplemented with video materials for in-depth study of the material.	
	"Digital and analog electronics» "Arduino for beginners» «CAD system».		1. The lecturer provides students with software. 2. Lecturer gives an assignment. Students enter the "Platonus" system. 3. The student gets access to educational material, practical tasks and control tasks through the "Platonus" system. 4. The head of the practice from the University provides consultations on the implementation of practical tasks. 5. Based on the results of the practice, the student prepares a report and demonstrates it.	Getting a certificate for the completed course (electronic certificate)

**Schedule of professional practice in training
using distance learning technology at the Agronomy Faculty (DET)**
